Ms. Montez Lane, Assistant Director of Community Outreach, attended the Wake Forest University School of Medicine 2010 “Share the Health Fair” held at Marketplace Mall on Saturday, January 9, 2010. The purpose of this health fair is to make basic health screenings, education and preventive health materials available to those who may not otherwise receive them. With over 600 people in attendance the fair was a huge success! Approximately 200+ individuals stopped by the tables to learn about the Maya Angelou Center for Health Equity and health equity issues. Health-related brochures and pamphlets were distributed. Information on diabetes and high blood pressure and Spanish materials were very popular.

Winston-Salem residents take brochures and pamphlets while at the Maya Angelou Center for Health Equity display table.
